Meta Performance Ads Analysis

Strategic Performance Review

JANUARY 1 – 27, 2026

Executive Summary

CROSS-BRAND PERFORMANCE OVERVIEW

JAN 1-27, 2026

Key Strategic Signals

Education Leads Growth

Education & problem-led TOFU is the only format delivering consistent scale + efficient CPAs across all brands.

Funnel Constraints

BOFU scale is currently constrained by TOFU pool size; retargeting pools need top-funnel volume to grow.

Creative Performance

Price-led & product-only creatives underperform. Testimonials work best as MOFU/BOFU support, not primary drivers.

TOTAL SPEND EFFICIENCY

SWF

CPA ₹250–₹425

Storytelling + seasonal context at TOFU driving highest scale. Benefit-led ads efficient (~₹320) when rotated sparingly.

HeartyK

CPA ₹200–₹470

Education-led wins. Simple comparisons & metaphors delivering lowest CPAs (₹265–₹280). Strong TOFU growth.

Meowsi

CPA ₹271–₹520

Problem-solving hooks (ULTi Winters) most efficient at ₹271. Texture-led differentiation driving discovery.

Huft Treats

CPA ₹285–₹355

Education-led videos & Yakies compilations achieving max scale. Product-only animation struggling at ₹700+.

SWF

Performance Overview

JAN 1-27, 2026

What's Working

- **Top-Funnel Storytelling & Seasonal Context**

  Winter Issues & Brand Film ads drove 200–400+ purchases with stable CPAs of **₹250–₹425**. Delivered highest scale & effective awareness.

- **Benefit-Led Messaging (Selective)**

  Achieved lowest CPA (**~₹320**) with healthy volume when used sparingly and rotated to avoid fatigue.

- **Testimonials for Consideration**

  Strong for Mid & Bottom funnel, delivering efficient CPAs (**₹279–₹425**) at lower volumes.

Areas for Optimization

- **Price-Led / Offer-Driven Messaging**

  "Rs.99 / Made for small dogs" creatives showed high CPAs (**₹700–₹800+**). Transactional hooks not resonating.

- **Over-Niche / Low-Context Creatives**

  Limited scale and negligible impact on purchases. Better suited as support content.

CPA Efficiency by Creative Theme

₹320
BEST CPA (BENEFIT)

400+
PURCHASES (STORY)

Insight: Storytelling drives volume, while Benefit-led ads drive efficiency.

SWF

Strategic Direction

JAN 1-27, 2026

TOP FUNNEL (SCALE)

Storytelling + Seasonal Narratives

Focus on reach and demand generation using winter-related context and brand films. Leverage emotional storytelling hooks.

MID FUNNEL (OPTIMIZE)

Benefit-Led Messaging

Use selectively for efficiency. Rotate benefit-led ads to avoid ad fatigue while maintaining healthy purchase volume.

BOTTOM FUNNEL (CONVERT)

Testimonials & Social Proof

Deploy customer testimonials and high-intent variations to drive final conversion at efficient CPAs.

De-prioritise

Price-Led Messaging

"Rs.99" offers showing high CPAs (₹700+) and low conversion rates.

Hyper-Niche Context

Over-specific creatives limiting scale with negligible impact on overall volume.

Strategic Outcome

By realigning the funnel strategy, we aim to achieve:

- Higher sustainable scale via storytelling
- Stronger brand impact & recall
- Controlled CPAs through selective MOFU ads

HeartyK

Performance Overview

JAN 1-27, 2026

What's Working

- **Education-Led Messaging**
  Strongest driver across funnel. TOFU & MOFU ads achieved strong scale with consistent CPAs of **₹200–₹470**.
- **Problem–Solution & Comparisons**
  Simple comparisons and metaphors delivered the lowest CPAs (**₹265–₹280**) and stronger CTRs than generic messaging.
- **Top Funnel Driving Growth**
  Majority of purchases coming from Top Funnel, indicating HeartyK is effectively in a category-education phase.

Areas for Optimization

- **Testimonial / Social Proof-Led Ads**
  Higher CPAs (**~₹500+**) when scaled as primary drivers. Better suited as support creatives.
- **Over-Complex Messaging**
  Multi-claim narratives (e.g., "Not made in lab") led to higher CPAs. Single-minded education performs better.

CPA Efficiency by Creative Theme

₹265
BEST CPA (PROB-SOL)

High
SCALE (EDU-LED)

Key Takeaway: Hearty wins when we educate first and simplify the problem.

HeartyK

Strategic Direction

JAN 1-27, 2026

TOP FUNNEL (SCALE)

Education-Led Storytelling

Scale education and problem–solution narratives. Focus on explaining the category to new users.

MID FUNNEL (OPTIMIZE)

Simple Comparisons

Use simple comparisons and myth-busting narratives. Simplify the problem to build trust.

BOTTOM FUNNEL (SUPPORT)

Testimonials

Deploy testimonials as reinforcement only. Retargeting pools are currently constrained by TOFU scale.

De-prioritise

Multi-Claim Narratives

Over-complex messages (e.g., "Not made in lab") lead to higher CPAs.

Abstract Messaging

Vague concepts perform poorly; single-minded education is superior.

Key Takeaway

HeartyK wins when we:

- Educate first
- Simplify the problem
- Build trust before conversion

Meowsi

Performance Overview

JAN 1-27, 2026

What's Working

- **Problem-Solving Hooks Drive Conversions**

  Problem-led creatives delivered the highest purchases. **ULTI Winters** achieved best efficiency with CPA **₹271**. Addressing pain points accelerates decision-making.

- **Product Differentiation at Top Funnel**

  "3 textures for picky eaters" performed strongly at TOFU, acting as an effective discovery driver with efficient CPAs of **~₹296**.

- **Product-Specific Storytelling**

  While broad storytelling lagged, highly product-specific narratives converted well at lower scales, bridging the gap between awareness and conversion.

Areas for Optimization

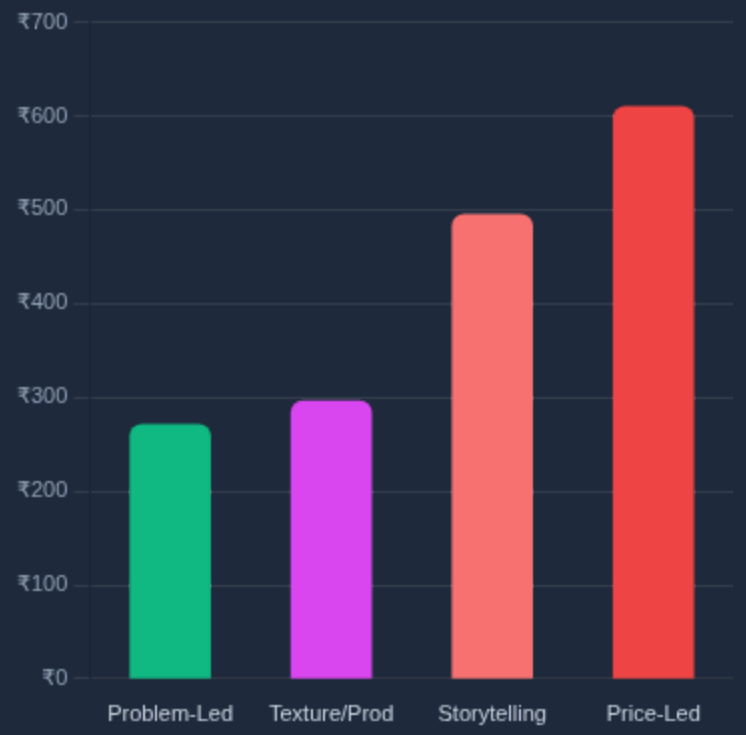
- **Broad Storytelling Builds Reach, Not Sales**

  Pure brand storytelling generated high awareness but weaker purchase efficiency with CPAs ranging from **₹470–₹520**.

- **Price-First Messaging**

  Price-led hooks underperformed compared to problem-solution narratives. Cat parents prioritize solution fit over transactional offers.

CPA Efficiency vs. Strategy



₹271
BEST CPA (ULTI)

High
VOL. (PROBLEM-LED)

Insight: Lead with real cat problems (picky eating, winter care) to drive efficient conversions.

Meowsi

Strategic Direction

JAN 1-27, 2026

TOFU (SCALE)

Problem-Solving Narratives

Lead with real cat-parent problems and clear product solutions. Avoid abstract stories.

TOFU (DIFF)

Texture & Product Hooks

Differentiate with "3 textures for picky eaters" to drive discovery and trial.

MID FUNNEL

Add Logical Proof

Layer in ingredient logic, visible results, and social validation to build trust.

BOTTOM FUNNEL

High-Intent Retargeting

Convert using strongest proof points and testimonials for decision acceleration.

De-prioritise

- Price-first messaging (undervalues product)
- Pure awareness storytelling (low conversion)

Leadership Takeaway

*"Meowsi converts best when we lead with **real cat problems** and **clear product solutions** — not on abstract brand stories."*

Focus: Utility

Visual: Textures

HUFT TREATS

Performance Overview

JAN 1-27, 2026

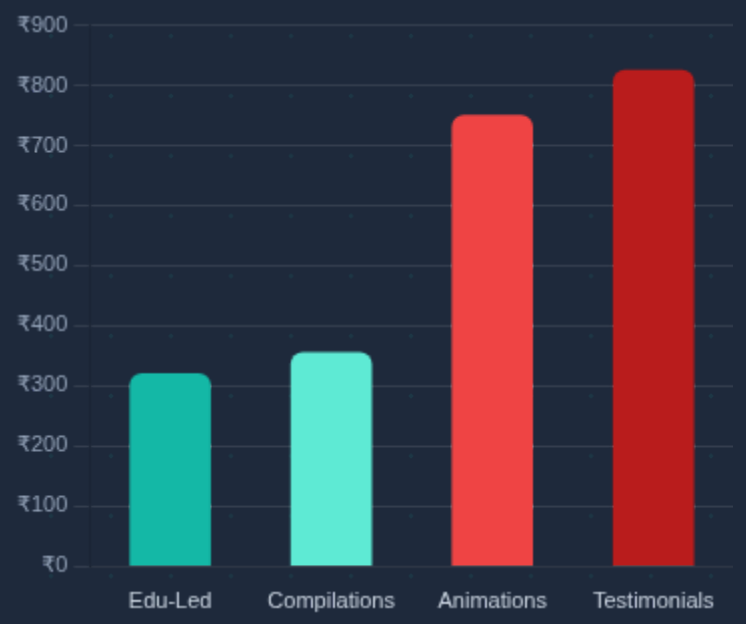
What's Working

- **Education-Led Top Funnel Scale**
  Awareness-led videos delivered highest purchases with stable CPAs of **₹285–₹355**. Yakies education & compilation formats achieved maximum efficiency.
- **Problem-Solution Framing**
  Consistently outperformed product-only messaging by addressing consumer "why".
- **Portfolio & Compilation Ads**
  Generated strong reach and volume. Effective for discovery when paired with sharper benefit hooks.

Areas for Optimization

- **Testimonials & Price-Led Messaging**
  Testimonial-only creatives showed high CPAs (**₹680–₹970**) and low scale. Price/value-led ads underperformed across the board.
- **Product-Only / Animated Creatives**
  Product-visual-first ads resulted in higher CPAs (**₹700+**) due to lack of educational context.

CPA Efficiency by Creative Type



₹285
BEST CPA (EDU-LED)

Yakies
TOP PERFORMER

Insight: Education-led storytelling is the only format delivering consistent scale and efficiency.

HUFT TREATS

Strategic Direction

JAN 1-27, 2026

TOP FUNNEL (SCALE)

Education-Led Storytelling

Focus on problem-solution narratives and education (e.g., Yakies). This is the only consistent driver of scale.

MID FUNNEL (OPTIMIZE)

Portfolio & Compilations

Use portfolio and compilation ads to aid discovery, but optimize with sharper benefit framing to improve efficiency.

BOTTOM FUNNEL (REINFORCE)

Testimonials & Trust

Deploy testimonials primarily as mid-funnel reinforcement and retargeting to build final trust.

De-prioritise

Price-Led Messaging

Price/value-led ads are underperforming significantly (CPAs ₹680–₹970).

Product-Only Animation

Animation-led visuals lacking a clear "consumer why" drive high CPAs.

Leadership Takeaway

- Education-led Top Funnel storytelling is the single most effective format.
- It is the only strategy currently delivering consistent scale combined with efficient conversions across the portfolio.

Cross-Brand Insights

CREATIVE MESSAGING STRATEGY MATRIX

JAN 1-27, 2026

EFFICIENT NICHE

MOFU/BOFU

- Testimonials & Reviews
- Product-Specific Stories
- Yakies Compilations
- Simple Comparisons

"High intent formats that convert well but lack breakout reach."

STAR PERFORMERS

TOFU DRIVERS

- Education-Led TOFU
- Education & Problem-Solving
- Problem-Solving (ULTi Winters)
- Storytelling + Seasonal Context

"The sweet spot: Scalable formats that maintain efficient CPA."

LOW EFFICIEN

EFFICI

UNDERPERFORMERS

DEPRIORITIZE

- Price-Led / "Rs.99" Offers
- Product-Only Animation
- Multi-Claim / Abstract Msg
- Over-Niche / Low Context

"Tactics that struggle to scale and deliver poor ROI."

EXPENSIVE REACH

BRAND AWARENESS

- Generic Storytelling
- Broad Brand Films

"High volume drivers but require optimization for purchase efficiency."

Strategic Recommendations

ACTION PLAN: NEXT 4 WEEKS

JAN 1-27, 2026

Brand-Specific Creative Priorities

SWF

- Scale **seasonal storytelling** for reach
- Rotate **benefit-led** ads to avoid fatigue
- Deploy testimonials for MOFU/BOFU conversion

HeartyK

- Double-down on **education-led** messaging
- Use **simple comparisons** & myth-busting
- Avoid multi-claim ads; keep it single-minded

Meowsi

- Lead with **problem-solving** narratives
- Highlight **textures** for product discovery
- Bolster MOFU with ingredient logic & proof

Huft Treats

- Expand **education-led** video formats
- Scale **Yakies** compilations for awareness
- Sharpen benefit framing in portfolio ads

Operational Strategy & Execution

Budget Allocation

TOFU 60-70%

Primary spend on Education & Problem-Solving formats to drive scalable reach.

MOFU 20-30%

Comparisons, Benefit-led, and Proof points to nurture consideration.

BOFU 10%

Testing Roadmap

Weekly A/B Tests: Focus on video hooks, first 3 seconds, and core claims.

Rotation Cadence: Rotate creatives every 7–10 days to combat fatigue in smaller MOFU/BOFU pools.

Format: Test static vs. video for same hook to determine most efficient format.

Measurement Framework

- Track **CPA by Creative Theme** (not just ad set) to identify winning narratives.
- Monitor **Reach & Frequency** to ensure TOFU is effectively filling the MOFU pool.
- Stabilize **BOFU CPAs** by expanding retargeting audience size.
